

The World's Most Advanced & Proven Soil Polymer

TeraGel® (T-200) Blue

Superabsorbent Polymer

(With added Nitroform slow release fertilizer)

EXTENDS THE TIME BETWEEN WATERING

Active Ingredients: 95% Cross linked

Polyacrylate copolymer

neutralized with potassium salt

5% Nitroform slow release fertilizer

APPLICATION & USAGE

Measure out the required amount of TeraGel® and mix thoroughly with soil of potential root zone.

POTTED PLANTS

6" – 8" 1 Rounded tsp
10" – 14" 1 Rounded Tbsp
1 Gallon 2 Rounded Tbsp
5 Gallon..... 3 Rounded Tbsp
15 Gallon..... 3 ½ oz.

Planting beds

1 sq ft (3 " depth).....2/3 Ounce
100 sq ft (3 " depth)..... 3 Ounces

LAWNS: 5 lbs /1000 Square Feet

Exercise Caution:

Extremely slippery when wet.
Handle as a mid irritant.
Do not inhale or ingest internally.
Do not put into drain.

BENEFITS!

Grows Healthier Plants and Lawns
Provides a Constant Water Supply
Improves Aeration for Better Soil
Saves on Fertilizer
Performs for 7 -10 years !
Environmentally Friendly

Gives everyone a "Green Thumb"
Net Weight: 1 lb (454 gms)
